OUTLOOK AND STRATEGY

The second quarter of 2020 continued to be a challenge to the economy still due to the COVID19 pandemic. Businesses nationwide were forced to shut down in the attempt of the government to keep the virus from spreading. Ending the 3-month long lockdown, the government gradually eased quarantine protocols and started partial reopening of the economy in mid-June. BSP caused a cumulative rate reduction of 150 basis points since March 2020 to help cushion the impact of this crisis on economic growth. Meanwhile, June inflation rate went up to 2.5% after four months of deceleration.

Treasury bills are continuously getting strong demand as investors turn to government securities for safer investments. As of June, the 3-month T-bills got an average rate of 1.746%, while the average rate of the 6-month paper was at 1.892% and one-year T-bills fetched an average rate of 1.98%. Meanwhile, private bank deposits are at 1.5724% on average for 30 to 90 day placement.

Yields in short term private deposits are still higher than regular savings deposit, which will continue to benefit the investment strategy of the fund. The fund will continue to invest primarily in short term placement with a 30 to 90 day range.
