OUTLOOK AND STRATEGY

March inflation rate accelerated to 4%, higher than the 3% recorded in February 2022 but slightly lower than March 2021 mainly due to the continuous increase in fuel, electricity, transport and food prices. The average inflation for the 1st quarter posted at 3.4%, lower than the 3.64% in the previous quarter. March inflation rate is within BSP's estimate of 3.3% to 4.1%.

As of March 2022, the yields for the 3-month, 6-month, and one-year T-bills averaged at 1.002%, 1.179%, and 1.514%, respectively, which are lower than the previous quarter. Meanwhile, private bank 30 days regular deposit rates averaged at 0.218%.

Returns on time deposits and special savings deposits remain higher than regular savings deposit, which is beneficial to the investment strategy of the fund. The fund will continue to invest primarily in short term placements within a 30 to 90-day range.

*Starting January 1, 2020, the average 30-day time/special savings rate of the top 3 private universal banks, Land Bank of the Philippines and Development Bank of the Philippines replaces the Bloomberg Philippines 30-day Special Savings Rate General Average as benchmark.
