All Directors, officers, and employees are expected to understand and comply with the DBP Code of Ethics which upholds the policy of the state to promote a high standard of ethics in public service. All meetings are documented and resulting feedback and recommendations are disseminated to the relevant Business Units or Board-Level Committee. At present, there are around 260 DBP Governance Circles established across the DBP head office and regional units.

E. INTERNAL CONTROL PROCEDURES AND RISK MANAGEMENT SYSTEM

1) Disclose the following:

(a) Internal Control Procedures and Risk Management Systems in place;

The responsibility of risk management resides in all levels of the organization with the Board being ultimately responsible for the overall risk of the Bank. The Board sets the tone and risk tolerance by articulating the Bank's risk appetite and establishing the risk management strategy for the Bank. The Board takes the lead in promoting a culture of risk awareness throughout the institution. The Enterprise Risk Management Group (ERMG) is primarily responsible for the establishment of a reliable and proactive enterprise-wide risk management process, policies, and procedures. Complementing the work of ERMG are the Internal Audit Group and Compliance Management Group which ensure that the risk controls are effectively carried out throughout the institution and that the Bank's practices adhere to governing regulations.

Risk and capital management at all levels of the organization institutes a culture of risk-based approach to decision-making. Management of risk is guided and monitored by various Bank

committees such as the Risk Oversight Committee, Governance Committee, Audit and Compliance Committee, Executive Committee, Trust Committee, Development Advocacy Committee, IT Steering Committee, Management Committee, Credit Committee, and Asset Liability Management Committee, among others.

The Board and Senior Management are provided with a detailed analysis of the Bank's portfolio and a comprehensive assessment of its overall risk profile to serve as a guide in strategy formulation in the year 2022. The Bank follows an Enterprise Risk Management (ERM) framework which integrates Strategic Planning, Internal Capital Adequacy Assessment Process, and Business Continuity Planning. The ERM involves risk assessment and identification from which formulation of risk management strategies emanates. Strategies take into account capital implications and other requirements to ensure the continuity of developmental service to the nation. These risk strategies, when implemented, are subject to monitoring and further evaluation to continually improve the risk management process. Capital adequacy rounds these up as it is needed to ensure financial stability as objectives are achieved even as risk management is enhanced.

The Board of Directors likewise ensures that there is an adequate, effective, and efficient internal control framework commensurate with the size, risk profile, and complexity of the operations of the Bank. Moreover, adherence to the Bank's internal control framework resides at all levels of the organization to provide reasonable assurance on the achievement of objectives through efficient and effective operations in areas including reporting, monitoring compliance with laws, regulations and internal policies, efficiency and effectiveness of operations, and safeguarding of assets.

In CY 2022, the Compliance Management Group utilized offsite procedures for the conduct of compliance risk testing and validation activities for the year and is expected to continue adopting the same for the succeeding year as well. This will ensure the safety of CMG personnel and enables the group to achieve its targets within the prescribed time despite challenges and limitations. At the same time, it continuously took steps to align the Bank's policies and procedures with existing, evolving, new regulations and best industry practices.

For external stakeholders, the Bank discloses internal controls procedures/risk management systems in place through the submission and publication of its Annual Reports and Notes to Financial Statements. Internally, these procedures and systems are documented in the Risk Management Manual and in DBP circulars, policies, and guidelines.

(b) Has the Board of Directors conducted a review of the bank's material controls and risk management systems?

Yes.

The ERM framework is regularly reviewed and updated to ensure that it remains aligned with the risk tolerance set by the Board and that it remains consistent with industry best practices and globally accepted frameworks. For CY 2022, the Board, through the ROC which ERMG functionally reports to, regularly discussed the adequacy and effectiveness of the Bank's risk management systems and operating policies through inputs and reports coming from ERMG and other business units. They revisited and reviewed pertinent credit policies and guidelines in view of the effects of various macroeconomic conditions, including the reeling effects of the pandemic and increasing inflation rates, amongst others, on borrowers' repayment capabilities. The Board likewise revised and updated the Bank's various market, liquidity, interest rate, and trust risk policies and models as well as various limits for Treasury activities. The reduction of the internal limit in the NSFR-Single Currency was approved to give the Bank more leeway in generating additional deposits and other sources of funds while being cognizant of competitive rates offered by peer banks. Enhancement of policies on information security risk management were also approved to ensure continued protection of

information assets. Also, in 2022, the Board approved the results of the Risk and Control Self-Assessment exercise, which determined the overall operational risk profile of the Bank. Additionally, the Board approved the revised ICAAP Steering Committee Charter to promote the continuing improvement of the Bank's ICAAP and risk management system.

On the other hand, the Board of Directors, through the Audit and Compliance and Committee, oversees the implementation of internal control policies/procedures and ensures that periodic assessment of the internal control system is conducted to identify significant control weaknesses. By overseeing the internal audit function, it ensures that the scope of internal audit work covers the review of the effectiveness of the Bank's internal controls, including financial, operational and compliance controls, and risk management system. The ACC noted internal audit reports, and ensures that Management is taking necessary corrective actions to address the weaknesses and non-compliance with policies, laws, and regulations.

(c) Does the Board of Directors provide comment/s on the adequacy of the bank's internal controls and risk management systems?

Yes, the Board commented on the adequacy of the Bank's internal controls and risk management systems in 2022. For instance, the Board approved the revised Industry Limits subject to a deeper and more extensive study of the mining industry and explore further the possible opportunities. On credit processes, they recommended enhancements to the Portfolio Quality Rating (PQR) reporting process and amendments to credit policies on clean Loans particularly the parameters of an acceptable clean loan. Additionally, the Board approved all risk management limits, which serve as the Bank's internal controls on its risk exposures. As such, they discussed salient points on the risk assessment performed by the Bank in 2022.

The ACC likewise commented and noted the results of the 2022 Annual Internal Report which contains IAG's opinion on the overall adequacy and effectiveness of the Bank's governance, risk management, compliance system, and control processes based on the audit evaluations throughout the year.

In safeguarding these consumer rights, DBP consistently subscribes to its fundamental values of commitment to public interest, transparency, professionalism, sincerity, efficiency, and responsiveness. With these fundamental values, DBP shall consistently strive to provide banking and financial products and services in a fair and equitable manner that promotes consumer empowerment and confidence in the banking and financial services sector.

The DBP Financial Consumer Protection (FCP) Framework, updated with the issuance of DBP Circular No. 13 on May 19, 2021, to comply with the BSP Circular No. 1048 and recent organizational updates, institutionalizes consumer protection as an integral component of corporate governance and risk management. The Bank's FCP Framework similarly embeds the customer protection standards of conduct, i.e., disclosure and transparency, protection of client information, fair treatment, effective recourse mechanism, and financial education and awareness, designed to implement an enterprise-level approach to ensure the protection of the customers' welfare in the provision or extension of financial products and services. This, in turn, creates an environment conducive for managing consumer protection risks inherent to the operations of the Bank. With the FCP Framework implemented across all Business Units, DBP seeks to foster a customer-centric mindset and institutionalizes a strong culture of service to provide adequate, fair, responsive, and inclusive financial services.

Strategic to the implementation of this framework, DBP employs a fully functioning Consumer Assistance Management System (CAMS). With the overall objective of continually improving the delivery and responsiveness of the Bank's products and services to the public, DBP's consumer assistance strategy is anchored on quality service and customer satisfaction through the effective management of customer feedback (i.e., suggestions, requests, inquiries, and commendations) and complaints.

The DBP consumer assistance mechanism focuses on the sustained implementation of a more effective DBP Customer Feedback and Complaints Handling Program towards improved customer service experience. This covers processes and procedures in receiving, processing, evaluating/analyzing, monitoring, interpreting, and resolving customer feedback and complaints received through the various channels, business offices, Customer Service email, telephone, and social media platform which is currently limited to Facebook. In addition to the regular in-house survey conducted across Business Units, the Bank engages a third-party research service provider to conduct an annual survey in compliance with GCG's mandatory requirements, which similarly aim to determine the customer's satisfaction level with the Bank's products and services.

The Bank enjoined the participation of all Business Units in the implementation of the FCP Framework by designating a Customer Service Officer (CSO) in all Business Units to serve as the focal person in handling customer inquiries, requests, and complaints from receipt through resolution. This is in addition to the creation of the Customer Experience Management Department mandated to implement the CAMS from receipt and handling of customer concerns through consolidation, analysis, and report generation. The reports are submitted to the Senior Management, the Board and BSP.

The Bank, through its various Business Units, implemented a total of eighty-five (85) programs/activities on financial literacy and awareness in 2022. These were in the form of seminars, roadshows on various products and services, and forums in the areas of development, agriculture, financing, investments, and business opportunities.
